

# ems Centre Solutions

## Million Rand Enhancement at reduced cost

To stay relevant shopping centres only needed a fresh coat of paint or a couple of new stores to ensure their consumer numbers were on the up year on year. Not anymore, a well specified shopping centre is expected to have a safe welcoming environment, with easy access to parking spaces.

Without a massive financial outlay, how do you stay fresh and relevant against newer centres?

Simple; significantly reduce your financial outlay, with ems. Our enhanced solutions fall into 4 distinct tiers of supply -

Information  
Atmosphere  
Safety  
Control

All solutions are adaptive to each clients unique environment, they can start small or be a full blown installation on commissioning, the important thing is that they always make a difference to your bottom line.

### Information - Car Counting

Add to existing booms & barriers at the entrances and exits and ramps within the structure. Notifies customers as to remaining capacity in any given area. Network connected displays enable low capital cost and can be augmented in time.

### Information - Car Navigation

Add to existing car park structure. Overhead bay indicators and signage display, direct customers to open spaces, all in one detect and illuminate devices ensure the lowest cost implementation.

### Information - Visitor Assistance

From remote Panic and Help points a simple press of a button directs the call to designated services be that Parking, Customer or Security, where customers are greeted and their request handled, audio messaging is played whilst they await call connection. We can alarm CCTV, turn on lights and generate a siren.

## Technical Details

### Information - Audio System Operation

Generating audio messaging from system alarms will reflect the state of the system. Pre-recorded messages remove client stress and inform them of any issues that may affect them during their visits.

### Atmosphere - Audio Handshake Greetings

Add to existing booms, barriers & pay stations at the entrances Tied to customer arrival, press button or feed card - 30 sec pre-set greeting or thank you.

### Atmosphere - Audio Handshake Promotion

Add to existing booms & barriers at the entrances Tied to customer arrival, press button or feed card - 30 sec pre-set promotional or store identification

### Atmosphere - SIP Based Audio

Add to existing IP structure to provide Public Address, Promotions or background music using bespoke POE based IP speakers, no amps no fuss

### Safety - Lift Integration

Replace your analogue system and integrate into your existing Commend system and have the alarm generated locally at Security, or off site at your central control room.

### Safety - SIP Based Emergency Points

Press of a panic or help point button directs the call to Security Services, where they are greeted and their request handled, warning audio is played whilst they await call connection, with relays we can power on lights to create a safe illuminated zone and trigger local cameras.

### Safety - Evacuation

An alarm input from a fire or alarm system can initiate a centre wide evacuation through the intercoms and display system. Can force parking booms to open.

### Control - Unattended Gate

An alarm input from a PIR or Motion Detection Video allows automated PA announcement for arriving delivery truck to use call button to announce details before remote gate opening.

### Control - Multi Office Access

Install multi-button SIP Access Intercom to allow delivery or visitor access just by the press of a button, opens booms, gates, or green light to allow guard boom operation.
