

ems University Solutions

Products to enhance your campus @ reduced cost

We wouldn't make the same choices now that we did then, times have changed.

Sound familiar?? You've run the figures, the infrastructure changes alone would eat a year' or two's budget without any real benefits being observed. You are stuck with old solutions offering the same poor choices with NO way to move forward.

Your facility used to be good but is now behind the times, lacking many of the new feature found elsewhere and it is affecting current students, operations and no longer attracts new students to study. It is a difficult spiral to escape from.

Our solutions do cost money, but the savings will make your campus good again.

Spend money to save money

All solutions are adaptive to each facilities unique environment, they can start small or be a full blown installation on commissioning, the important thing is that they always make a difference to your bottom line.

Some highlights of our potential actions covers

- Access Control changes
- Remote Gate Access Scheduling
- Card and technology upgrades
- Fingerprint on card
- Residential Access, Management and Safety Solutions
- Unified PA with Local and Remote Information & Emergency Announcements, Audio Atmosphere or Warnings by Campus, Block, Building, or Area, by classroom or residence, in campus or on adjacent streets
- Mobile Credentialing and implementation

Capital Project Integration

Competative bidding always ensures that the cheapest usable solution is installed, with intercoms little regard is given to sound quality, global integration and central management processes, with ems Intercom solutions we redress these imbalances, retruning quality and freeing up manpower resources.

Inventive Solutions
