- Incident reports
- One-on-one instant messaging with fellow officers
- Secure login with user name and password
- Search state and national criminal databases as well as your RMS/JMS
- Meets FBI data encryption standards
- CAD Dispatch Interface
- "Officer Needs Assistance" Panic Button
- Touch screen capable

Realize the power of up to date, complete information while on patrol with IntelliMobile. Developed using the latest technologies, IntelliMobile gives officers the most functional mobile product on the market today

Officers are given the ability to wirelessly query state, local and NCIC data simultaneously in the field without having to radio dispatch. Responses are quick with audible and visual responses allowing officers to maintain eye contact with the subject or vehicle in order to remain focused on possible threats.

The mapping function continuously shows the position of the mobile unit on the map along with its bearing and speed. IntelliMobile shows all agency units on the map helping to improve officer response capabilities and safety.

IntelliMobile provides officers with the tools necessary to make the everyday work of law enforcement easier and more convenient while on patrol.

Multiple Search Capabilities

Search state and national criminal databases for:

- Missing persons using name or driver's license numbers
- Outstanding warrants
- Vehicle registration based on VIN or registration numbers
- Stolen vehicles based on VIN or registration numbers
- Boat registration information and stolen boats based on registration or serial numbers
- Stolen guns based on registration or serial numbers

All Search Results are Speech Enabled for added convenience and officer security.

All Searches are encrypted for data protection.

Images associated with the search results are displayed in a separate window.

Advanced Mobile Policing Technology Increases Officer Safety and Knowledge While on Patrol

Features

- Offers searching of state and national criminal databases on a mobile police unit.
- Offers full access to your Records Management System.
- Provides the ability to create incident and accident reports, citations, and field interviews on the spot and upload them to your RMS.
