- IP addressable products -

EMS is a supplier of world class solutions to all countries in Sub-Sahara Africa. Concentrating on superior suppliers, EMS is able to offer high specification, high quality products at competitive pricing. As a distributor we supply through our network of partners, and additionally we will assist end users in their design process and recommend installation partners.

HID Cards and Readers

HID Global is the trusted leader in providing access and ID management solutions for the delivery of secure identity. HID expands the flexibility of its products by adding multiple-technology capabilities to its entire product line. Users of HID products can select the specific technology combination that best suits the needs of their applications, or can add higher levels of security by using multiple technologies at each door.

With the streamlining of business IT and the privacy issues of central data storage, clients are demanding their users carry their authentication methods on-card. HID addresses this need with a range of cards of mixed technologies and data carrying capabilities that add to the standard card information with ID picture, facial and finger biometric templates, electronic purse and critical medical information, to be read off card and matched at the point of usage, without the support of additional database structures.

Sagem Sécurité Biometrics

Sagem biometric terminals are used in both physical and logical Access control systems as well as time and attendance systems and logistics. Sagem produces the fastest terminals offering One to Many identification in South Africa today, add this to the quality of image and overall product design and it is no surprise that Sagem products have been specified for the most hostile environments. The unique outdoors fully IP 65 readers protect against more than the weather.

Commend IP Intercoms

Commend Intercom Solutions, including Intercom over IP and Help Point Systems, provide very secure, private communications with high volume, high quality hands free speech and unmatched reliability. The modular nature of the hardware, the variety and ease of configuring the functionality provided, the provision of high volume, high quality speech, the quality of it's design and build, the proprietary nature of its protocol's, and the ability to interface with other systems to provide a seamless, integrated whole. Commend Intercoms, a long life with reliability and quality of performance second to none.

Quorum Access Control

With our wealth of experience in Access control and peripheral solutions, EMS has simplified how business operates and uses their access control to manage their business more efficiently. Information available at their desk or on their smart phones, allowing to the moment snapshots of their business. Quorum web based software, built on standard IT framework with peripherals such as TCP/IP cameras, i-Class and proximity readers as well as biometrics, all providing an integrated information gathering solution via web pages.

EMS will help in the correct selection of product for the application and can offer the assurance that when quality, speed and price is an issue then we have the right product range to ensure success. **We offer the complete range of cards and readers off the shelf and overnight delivery anywhere in South Africa.**
