

naviGO™ Server

Credential Management Software

- ▶ **Simple** – Centralized management and deployment
- ▶ **Secure** – Easily configured and deployed two-factor authentication
- ▶ **Smart** – Single credential for both facility and network access

ACCESS management.

Strong Authentication is now practical for ALL. naviGO™ Server by HID Global is a cost-effective solution that simplifies deployment of strong authentication and manages the lifecycle of strong authentication user credentials including Crescendo™ smart cards (with digital certificates), iCLASS® smart cards, Prox cards and Knowledge Based Authentication (KBA).

Built on Microsoft® .NET, naviGO Server is the first credential management solution that is practical for both large and small organizations. No longer are organizations required to become experts in encryption and complicated security technology to effectively provide strong authentication to network infrastructure. Just as you do not expect your employees to become locksmiths to open a door, they should not need to become security experts to authenticate to computer systems.

naviGO Server is uniquely designed with organizational workflows in mind. The solution enables your organization to set logical workflows that fully automate the deployment and lifecycle events involving strong authentication. Secure employee self-service capabilities including KBA, PIN setup and reset help reduce costs, administrative burden and complexity routinely experienced in strong authentication deployments.

- ▶ Uniquely tailored for Microsoft environments and easily integrated into Microsoft Active Directory, ADAM (Active Directory Application Mode), SQL, Internet Information Services (IIS), Certificate Services and other core Microsoft infrastructure.
- ▶ Easily configure what action will take place when the smart card is removed from the reader: Lock the Workstation, Log Off the current User or do nothing.
- ▶ Emergency Access feature enables users to access critical data when their primary credential is not available.
- ▶ Supports HID's Crescendo on the Desktop™ Solution
 - Crescendo C200 and C700 cards
 - OMNIKEY® readers 3021, 3121
- ▶ Supports HID's iCLASS on the Desktop™ Solution
 - iCLASS cards
 - OMNIKEY 5321 and 6321 reader lines
- ▶ Supports HID's Prox on the Desktop™ Solution
 - HID Prox cards
 - OMNIKEY 5325 reader line
- ▶ Supports RF Ideas Air ID Writer® and pcProx® readers
- ▶ Supports PC/SC compliant contact smart card readers

Features

Strong Authentication

HID naviGO™ Server enables an organization to use the same contact or contactless credential used for entering the facility, to now log-on to their PC and access folders and files on the network.

Deployment

HID naviGO allows card holders to perform their own enrollment and manage their PIN and knowledge-based authentication through a self-service browser-based application.

Security Compliance

Simplify compliance with corporate and federal security and privacy policies providing compliance administrators with full audit trail visibility about the issuance and usage of advanced authentication devices.

Central Administration

Central administration of credentials provides for rapid provisioning and de-provisioning of credentials. Self service workflows mean reduced help desk calls, earlier employee acceptance and better compliance.

Part Number

86404

System Requirements

naviGO™ Server

- Microsoft® Windows® Server 2003 R2 Enterprise Edition or Windows® Server 2008
- .NET Framework 2.0
- Microsoft Windows® Installer 2.0 or higher
- Microsoft SQL Server 2005
- Microsoft Internet Information Services (IIS) 6.0
- Microsoft Certificate Services (optional component)
- Minimum Microsoft® configuration for selected Microsoft® Windows® Server Enterprise Edition
- Minimum 50 MB of free HDD space

Client Operating Systems

- Microsoft® Windows® 2000 (SP4 Crescendo Only), Windows® XP (SP1, SP2 or SP3), Vista SP1
- Minimum Microsoft® configuration for selected Microsoft® Windows® Operating Systems
- 60 MB of available hard disk space for naviGO Client
- 90 MB of available hard disk space for Microsoft .NET Framework 2.0
- Internet Explorer 6.0 or higher with 128-bit encryption
- Installation via MSI package requires Windows® Installer 2.0 or higher

Supported Languages

English, Spanish, Brazilian (Portuguese), French, German, Italian, Russian, Japanese, Chinese (Simplified) and Korean.

Supported Standards

iCLASS® and Crescendo® smart cards and readers
ISO 14443 A/B and 15693 for HID iCLASS
MS Mini Driver - WHQL Certification for XP and Vista (Crescendo Only)
MS CAPI (Crescendo Only)
PKCS #11 (Crescendo 700 Only)
